EDUCATION

- 2020-2020 + Udacity | Online Programming Education
Front End Web Developer Nanodegree
- 2015-2020 + Politecnico di Milano | Milan, Italy
Bachelor's Degree, Computer Engineering

EXPERIENCE

- 2019-2020 + Deloitte | Milan, Italy
Junior Front End Developer
- Collaborated closely with back end developers to build new web pages and update existing features.
 - Brought to life user interfaces created by design teams using latest web standards and using Salesforce Commerce Cloud.
 - Tackled several bug fixes regarding the user interface, such as styling of images/text, pages not loading properly or from the correct source, and browser compatibility.
 - Worked with Scrum methodologies, on an agile environment.

SKILLS

- Languages + HTML, CSS(SASS&LESS), Javascript, C, Java
- Frameworks + Git, React JS, Webpack, Bootstrap, Foundation, Salesforce, Jira
- Graphical + InVision, Figma, Photoshop

PROJECTS

- 2020 + Portfolio Website
- Created my personal Website, a single page web application built with HTML/CSS/Javascript.
 - Used the building tool Webpack to minify assets into few bundles.
- 2020 + Rock/Paper/Scissors Game
- Developed a rock/paper/scissors game using React JS.
 - Designed the final product aesthetic and user experience.
- 2020 + Travel App
- Built a complex travel application that gets information about user's upcoming trip and dynamically populate the UI.
 - Implemented Service Workers to allow offline access.
 - Tested the code with the performance testing framework Jest.
- 2020 + NLP Analysis Web App
- Built a web tool that allows users to run Natural Language Processing (NLP) on articles or blogs found on other websites.
 - Implemented a new API called *MeaningCloud* to calculate rolling sentiment averages on aggregated data.
- 2020 + Weather Journal App
- Created an asynchronous web application that uses Web API and user data to dynamically update the UI.
 - Set up a server environment with Node.JS and Express.
