Profile

Curious and enthusiastic, I am interested in IT and everything in its orbit. During my studies at Politecnico di Milano (Italy), I began to be fascinated by web programming. Once completed my BS Degree, I started working at Deloitte (Milan) as a Junior Front End Developer, gaining experience building modular front-end commercial solutions inside a team of a complex multi-brand B2C eCommerce replatforming project for some major Italian Fashion and Luxury companies. Then I decided to challenge myself with Udacity Front End Nanodegree program, where I learned how to build asynchronous web applications using technologies like HTML, CSS, JavaScript, Node.js, Web APIs and I also was amazed by the power of building tools such as Webpack.

Work Experience

Deloitte Consulting
September 2019 – June 2020
Milan, Italy
Junior Front End Developer

• Worked closely with back-end team and designers to build new web pages and update existing features
• Tackled several bug fixes regarding the user-interface, ex: styling of images/text, pages not loading properly or from the correct source, and browser compatibility
• Used Salesforce building tool Page Designer to build new content assets

Education

Front End Web Developer Nanodegree
June 2020 - August 2020
Remote
Udacity, Online Programming Education

Bachelor's degree, Computer Engineering
September 2015 - March 2020
Milan, Italy
Politecnico di Milano, Milan (Italy)

Projects

Personal Website (Portfolio)
August 2020 - Present
• Created my personal Website, a web application built with HTML/CSS/Javascript.
• Used the building tool Webpack to minify assets into few boundles.

Travel App
August 2020 - August 2020
• Built a complex travel application with HTML/CSS/Javascript that gets information about user's upcoming trip.
• Set up a server environment with Node.JS and Express.
• Tested the app with Jest, a JavaScript library for creating, running, and structuring tests.
• Used the building tool Webpack to minify assets into few boundles.

Article Analysis Web App
July 2020 - August 2020
• Built a web tool with HTML/CSS/Javascript that allows users to run Natural Language Processing (NLP) on articles or blogs found on other websites.
• Implemented a new API called MeaningCloud to calculate rolling sentiment averages on aggregated data.
• Set up a server environment with Node.js and Express.
• Used the building tool Webpack to minify assets into few boundles.

Weather Journal App
July 2020 - July 2020
• Created an asynchronous web app that uses Web API and user data to dynamically update the UI for a Weather-Journal App.
• Set up a server environment with Node.js and Express.
